**Product overview**

**Product image**

*S51-1 Two-position Control with PCOR P7, P8*

**Nomenclature**

*S51-1 model code*

*Code M and N options*

<b>M</b>	<b>Description</b>	<b>N</b>	<b>Description</b>
P7	Electrohydraulic two-position control with electric proportional pressure compensator override, 12 Vdc	P7	Electric brake pressure defeat, 12 Vdc
		C2	Without brake pressure defeat
P8	Electrohydraulic two-position control with electric proportional pressure compensator override, 24 Vdc	P8	Electric brake pressure defeat, 24 Vdc
		C2	Without brake pressure defeat

Only certain control options for the S51-1 motors utilize the Electrohydraulic 2 Position Control w/Electric Proportional Pressure Compensator Override to Maximum Angle. The combination of the M and N modules define the motor control's functionality. Please refer to the motor's nomenclature to determine if the motor is equipped with the proper options. The nomenclature can be found on the motor's nametag.

**Product overview**

**Theory of operation**

**Proportional displacement control**

Displacement can be changed electrohydraulically under load in response to an electrical signal from minimum displacement to maximum displacement and vice versa by controlling the PCOR setting proportional to the current of a solenoid.

- Solenoid not energized = maximum displacement

**Override to maximum angle**

To shift the unit under all conditions to maximum angle, supply the spool with 1600 mA (12 Vdc) or 800 mA (24 Vdc).

**P7, P8**

Pressure compensator configuration: P7, P8 with electric brake pressure defeat.

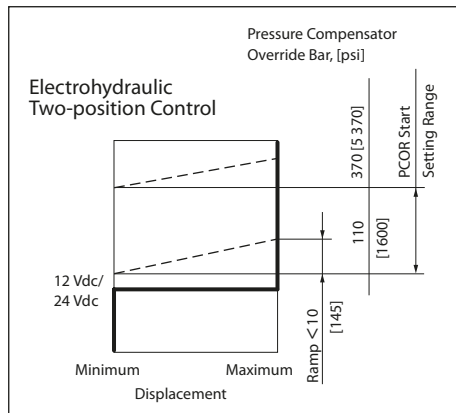

A solenoid-switched valve, ahead of the pressure compensator, prevents operation in the deceleration direction (when the motor is running in pump mode). This is designed to prevent rapid or uncontrolled deceleration while the vehicle/machine is slowing down.

**C2**

Pressure compensator configuration: C2 without brake pressure defeat.

Pressure compensator functions when the motor is running in motor mode as well as in pump (deceleration) mode.

**Control operation**

**⚠ Warning**

Unintended vehicle or machine movement hazard. The loss of hydrostatic drive line power, in any mode of operation (forward, neutral, or reverse) may cause the system to lose hydrostatic braking capacity. You must provide a braking system, redundant to the hydrostatic transmission, sufficient to stop and hold the vehicle or machine in the event of hydrostatic drive power loss.

**Product overview**

**Hydraulic schematics**

*Circuit diagram - Motor with Electrohydraulic Two-position Control P7P7, P8P8 with Pressure Compensator Override (PCOR) to maximum angle and with electric brake pressure defeat*

*Circuit diagram - Motor with Electrohydraulic Two-position Control P7C2, P8C2 with Pressure Compensator Override (PCOR) to maximum angle*

**Product overview**
**Electrical specifications**
*Proportional PCOR solenoid*

<b>M-option</b>	<b>P7</b>	<b>P8</b>
<b>Voltage</b>	12 Vdc	24 Vdc
<b>Minimum Proportional PCOR Start Current</b>	255 mA	127 mA
<b>Maximum Proportional PCOR End Current</b>	1370 mA	685 mA
<b>Minimum Angle Override Current</b>	1600 mA	800 mA
<b>Nominal Resistance at 20° C [68° F]</b>	5.7 Ω	21.2 Ω
<b>PWM frequency range*</b>	100 to 200 Hz	100 to 200 Hz
<b>Recommended PWM frequency</b>	100 Hz	100 Hz

\* Verify the PWM frequency is set correctly in the PLUS+1® controller. The default is set at 4000 Hz which will significantly reduce performance.

*Electric brake pressure defeat solenoid*

<b>N-option</b>	<b>P7</b>	<b>P8</b>
<b>Voltage</b>	12 Vdc	24 Vdc
<b>Rated power</b>	34 W	34 W

**Electrical installation**
**Pinout**
**AMP Junior Power Timer connector**
*Pin location*

*Pinout*

Pin	Function
1	PWM signal
2	Ground

*Pinout (alternative)*

Pin	Function
1	Ground
2	PWM signal

**Pin compatibility**
*PLUS+1® module pin type/ Electric proportional solenoid pin compatibility*

Pin	Function
1, 2	PWMOUT/DOUT/PVG Power supply*
1, 2	PWMOUT/DOUT/PVGOUT*
1, 2	Power ground -

\* Use output pins with configurable PWM frequency.

*PLUS+1® module pin type/ Electric brake pressure defeat solenoid*

Pin	Function
1,2	DOUT
1,2	DOUT/PVG Power
1,2	PWMOUT/DOUT/PVG Power supply
1,2	PWMOUT/DOUT/PVGOUT
1,2	Power ground -

**Pressure compensator logic**
**Electric brake pressure defeat**

Rotation	High pressure port	Solenoid	PCOR function
CW	A	Energized	Yes
CW	A	Non-energized	No
CCW	B	Energized	No
CCW	B	Non-energized	Yes

**Electrical installation****Mating connector****AMP connector parts list**

Description	Quantity	Ordering number
Two pin connector	1	Tyco Electronics 282189-1
Contacts	2	Tyco Electronics 929940-1
Seal plugs	2	Tyco Electronics 828904-1
Mating connector kit	1	Danfoss K19815

**Products we offer:**

- Bent Axis Motors
- Closed Circuit Axial Piston Pumps and Motors
- Displays
- Electrohydraulic Power Steering
- Electrohydraulics
- Hydraulic Power Steering
- Integrated Systems
- Joysticks and Control Handles
- Microcontrollers and Software
- Open Circuit Axial Piston Pumps
- Orbital Motors
- PLUS+1® GUIDE
- Proportional Valves
- Sensors
- Steering
- Transit Mixer Drives

**Danfoss Power Solutions** is a global manufacturer and supplier of high-quality hydraulic and electronic components. We specialize in providing state-of-the-art technology and solutions that excel in the harsh operating conditions of the mobile off-highway market. Building on our extensive applications expertise, we work closely with our customers to ensure exceptional performance for a broad range of off-highway vehicles.

We help OEMs around the world speed up system development, reduce costs and bring vehicles to market faster.

Danfoss – Your Strongest Partner in Mobile Hydraulics.

**Go to [www.powersolutions.danfoss.com](http://www.powersolutions.danfoss.com) for further product information.**

Wherever off-highway vehicles are at work, so is Danfoss. We offer expert worldwide support for our customers, ensuring the best possible solutions for outstanding performance. And with an extensive network of Global Service Partners, we also provide comprehensive global service for all of our components.

Please contact the Danfoss Power Solution representative nearest you.
